

NCJ6FI-V-AE

New: With ESD protective push tab improving electrostatic discharge and component protection.

XLR / jack hybrid chassis connector combining 3 pole XLR receptacle and 1/4" jack. Improved ESD performance with asymmetric non-metallic push.

Features & Benefits

- Protection against electrostatic discharge and components due to compound material of the push tab
- Combined XLR receptacle and 1/4" phone jack
- Saves rack space by combining 2 connectors in one housing

- Balanced or line inputs in one XLR shell
- Very low conductor capacitance, therefore suitable for digital audio
